REPLACEMENT PARTS AND REPAIR

In order to ensure your ventilation unit remains in good working condition, you must use v nEE genuine replacement parts only. The v nEE genuine replacement parts are specially designed for each unit and are manufactured to comply with all the applicable certification standards and maintain a high standard of safety. Any third party replacement part used may cause serious damage and drastically reduce the performance level of your unit, which will result in premature failing. Also, v nEE recommends to contact a certified service depot for all replacement parts and repairs.
